Construction, design and use of stand and paddock area.

Participants should use the place and space in the paddock that the organization assigns them.

The structure and layout of the stand space should take place with as a basis to inform about and promote the Wankel rotary engine, or technology. Vehicles and information that do not comply may only be parked in the paddock with the consent of the organization.

Visitors and participants must park their vehicles and / or move as directed by the organization or authorized volunteers.

On the paddock, one needs to move slowly using alarm lights.
Pedestrians have priority.

Burnouts are strictly prohibited. Both in the paddock and on the track.

Users of a stand or paddock should leave this place clean and without waste.

Catering accommodation is reserved to the landlord or by an accepted third party.

Participation in the activities

Participation is at your own risk.

On results cannot be discussed.

Indications of organization and / or qualified volunteers should always be followed.

Participation in circuits activity is allowed after signing the disclaimer form. This shall be the organization and volunteers safeguard from liability and prosecution.

Attention! Your car may be uninsured while participating in activities in a circuit! Participant is liable for damage to private and other vehicles and personnel and equipment on the circuits and on circuits, surround and fencing!

When entering the circuit with a vehicle you are required to wear a helmet.

It is forbidden to enter the circuits area unless as a volunteer, designated by the organization, or as a participant access.

Vehicles may produce up to 91 dB.

At the request of the organization you have your vehicle checked technically.

At the request of the manager of the circuit I want to make you aware of the use of environmentally sails. This applies only to the participants of the course program. Such a tarp is a plastic tarp for under the car meant against leakage. A sail of such a DIY shop can suffice. When you know you have leakage it is recommended to use such a tarp. This also to avoid cleaning.

In all cases the organization and the circuits board decide about participating in one of the job and / or paddock activities.

Of language or translation errors cannot be held.

By entering this circuit, you agree to these terms.
